- Which of the following best describes the acceleration of an object moving at constant speed in a circle?
- What is the main method of heat transfer in a good thermal insulator?
- Which component in an electric circuit limits current?

Structured Questions

These questions required detailed responses, calculations, and diagrams. Typical examples:

- Calculate the velocity of a car that accelerates uniformly from 10 m/s to 20 m/s over 5 seconds. Show all your working.
- Describe an experiment to investigate the specific heat capacity of a metal block. Include the apparatus, procedure, and how to calculate the specific heat capacity from your data.
- Explain the principle of electromagnetic induction with the help of a labelled diagram. Describe a practical application of this principle.

Sample Questions and Their Analysis

Sample Question 1: Mechanics

Question: A ball is thrown vertically upwards with an initial speed of 20 m/s. Calculate how high the ball will rise before it starts descending. (Take $g = 9.8 \text{ m/s}^2$)

Analysis:

- The question tests understanding of equations of motion.
- Requires knowledge of the relation: $v^2 = u^2 + 2as$.
- Here, final velocity at the highest point $v=0$.
- Solve for s (height):

$$s = (v^2 - u^2) / (2a)$$

$$s = (0 - (20)^2) / (2 \cdot -9.8) = 400 / 19.6 \approx 20.41 \text{ meters}$$

This type of question assesses students' ability to apply physics formulas and interpret real-world scenarios.

Sample Question 2: Thermal Physics

Question: Describe an experiment to determine the specific heat capacity of an unknown metal. Include the steps, measurements, and calculations involved.

Analysis:

- Candidates should outline an experiment involving heating the metal, recording temperature changes, and measuring heat energy supplied.
- The calculation involves:

\[

$$Q = mc\Delta T$$

\]

where Q is the heat energy, m is mass, c is specific heat capacity, ΔT is temperature change.

- Students should emphasize controlling variables, calibration, and accurate measurement techniques.
