- Third Law: For every action, there is an equal and opposite reaction, exemplified by the pushing forces during rides.

Energy Transformation

Energy conversion is vividly demonstrated in roller coasters:

- Potential energy at the crest of a hill transforms into kinetic energy as the coaster descends.
- Friction and air resistance dissipate some energy as heat, which was discussed during the experiments.

Centripetal Force and G-Forces

High-speed turns and loops generate centripetal force, which was explained through demonstrations of G-forces:

- Participants experienced G-force simulations using rides and stationary setups.
- The physics behind feeling "heavier" during turns was explained through centripetal acceleration.
